Semi-static ropes with adjustable steel locking mechanism for positioning work. Includes rope protector to avoid direct rubbing during positioning.

The work in positioning consists of surrounding a profile with the positioning rope, to achieve an optimal and comfortable working point.

It is mandatory to work with a fall protection system, in addition to the positioning rope, in case of risk of falling.

Norm	EN358 + EN 362
Diameter (mm)	12
Conectors opening (mm)	18
Length (m)	2
Weight (Kg)	1,06
Lifetime	10 years of use+ 2 year of storage

Material	
Rope	Polyester
Rope guard	Polyester
Rope regulator	Steel
Conectors	Steel
